## VOLUNTEER EXPERIENCE

Open Source Community (07/2021 - Present)

*Contributed PRs to open source projects on GitHub [GitHub Link](#)*

## SKILLS AND TECHNOLOGIES

Collaboration

Communication

Critical Thinking

Problem Solving

Javascript

React

HTML5

CSS3

SASS

TailWind

Version Control

Python

Cloud FireStore

Firebase Real-Time Database

## PERSONAL PROJECTS

### Messaging Application (ChatClone)

- [Live Site](#) and [GitHub Code](#)
- Built a messaging web application that allows real-time messaging between users.
- Utilized firebase SDK for the backend which involves fetching, ordering, and querying.
- Implemented user authentication for the web application.

### Banking Application (BankSafe)

- [Live Site](#) and [GitHub Code](#)
- Built a multi-page banking app that allows users to transfer "money" from a user to another via their unique bank numbers.
- Implemented user authentication for the web application.
- Utilized firebase as the back-end for the app, made use of its API services to implement various functionalities such as sorting each app user.

### Music Web Application (30Sec)

- [Live Site](#) and [GitHub Code](#)
- Built a multi-page web application that allows audio preview of various songs.
- Built a custom Audio player for the web application.
- Implemented Search functionality to find songs.

### Food Ordering App (Foodie)

- [Live Site](#) and [GitHub Code](#)
- Built a single-page app where users can order for their meal by add/removing from cart before finalizing their payment.
- Integrated with a third-party Restful API to fetch and display various data.
- Implemented Form validation for the forms
